

### Solid & Semi-Tubular Rivets

Jay-Cee Sales & Rivets carries both solid and semi-tubular rivets. They are available in aluminum, steel, stainless steel, copper, brass and monel. Various platings, anodizings and other coatings are available for both extra protection and aesthetics.

### Blind Rivets

Blind Rivets are multi-piece rivet assemblies, capable of being installed from one side of the workpiece. Traditionally, blind rivets were used on areas which are limited to access to one side of the structure. There are many different types of blind rivets for various applications

### Riveting Tools

Jay-Cee Sales & Rivet, Inc. supplies tooling for your riveting applications. Tools are available for both applications along with solid and semi-tubular rivets. We are your one stop shop for both your rivets and your tooling.

### Rivetnuts & Threaded Inserts

We offer a complete line of rivet nuts and threaded inserts with a variety of features: splined and non-splined body, large and small flange head, high strength threads and more. Our rivet nuts will fit all of you requirements for any application.
